

Pass

Pass the ball to **another** piece. You can pass in a **straight** line (*diagonal or orthogonal*), **any** number of spaces.

You **may** pass over your **own** pieces, but **not** your **opponents**.

No "Wall Stall"

You have to **leave a gap** by which your opponent can continue to move **new pieces** into your **end zone**.

NO building an impenetrable wall across the board.

No "Ball Stall"

The player with the ball must at **all times** ensure at **least one** visible path for the other player to **tackle** and gain control of the ball. You have to **leave a gap**, **no completely surrounding** the ball.

Variants To Try

(or why not invent your own?)

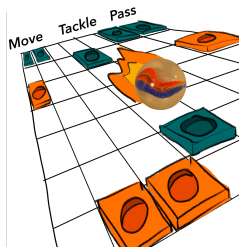

'Turbo' Dus Dus Dus: The maximum move action is **increased to 4**. A freer, more unpredictable (and volatile) game. *Faster and swingier, less crunchy and tight. Wild plays possible, harder to defend.*

'Slow Poke' Dus Dus Dus: The maximum move action is **decreased to 1**. An incremental game of attrition and foresight. *More emphasis on passing, pieces may 'outrun' each other if they find sufficient space.*

How To Win

Pass the ball into your opponents **end zone** (their starting row.)

Set Up

One team **each**, opposing board **edges**.

Starting with **1st player**, each player selects a piece as their 'champion' and moves it **two spaces** forward.

1st player's champion holds the **ball**. The Ball is **neutral**, and always held by a piece.

How To Play

Players take exactly **3 actions** per turn. ("Dus, Dus, Dus... your go")

There are **3 types** of action you can **mix and match**:

***move**

***tackle**

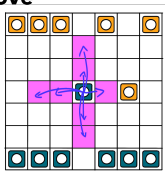

***pass**

You can use **any combination** of Move, Tackle or Pass to make up your **3 action combo**. Including multiples of the same type.

Use **different** pieces or the **same piece** multiple times.

Move

Move your piece **two** spaces or less, along a **row or column** (ie. *Orthogonally*) in a **straight line**.

You may **not** move a piece **diagonally**.

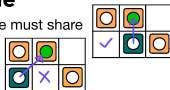

You may **not** move in an '**L**' shape (this would count as two 'moves').

You may **not** move **over or through** another piece.

You may **not** move a piece while it is holding the **ball**.

Tackle

To make a **tackle**, your piece must share an **edge** (not a corner) with the opponents piece that holds the **ball**.

The tackling piece **takes the ball** AND gets a **free** movement of **1 space** in any direction including **diagonal**. Tackling is the **only context** where a piece may move diagonally.

A piece may **not** arrive **or** remain in its opponent's **end zone** at the **conclusion** of a tackle.

You can only **WIN** by Passing.
